

# Browser Support

## CONTENTS

Mobile

Desktop

Ionic's earliest goal was to make it easy to develop mobile apps using web technologies like HTML, CSS, and JavaScript. Because of this foundation in web technologies, Ionic can run anywhere the web runs — iOS, Android, browsers, Electron, PWAs, and more.

## Mobile

In pursuit of [adaptive styling](#), Ionic fully supports and is well tested on the mobile platforms listed below:

Platform	Supported Versions
Android	4.4+

iOS

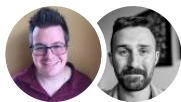

10+

Check the [latest Android stats](#) and the [latest iOS stats](#) for up-to-date platform information.

# Desktop

Because Ionic is based on web technologies, it works just as well on desktop browsers as it does on mobile devices. For more information on desktop layouts, see [Cross Platform](#).

Browser	Supported
Chrome	✓
Safari	✓
Edge	✓
Firefox	✓
